PROFESSIONAL EXPERIENCE

Freelance

Cybersecurity Analyst | *Apr 2026 – Current*

Independent consulting on Cybersecurity assessments and business infrastructure

- Installed, configured, and administered firewalls, VPNs, managed switches, and NAS infrastructure.
- Scanned network segments for security vulnerabilities and misconfigurations.
- Hardened infrastructure via network segmentation, OS, service configurations, and log storage.
- Implemented monitoring tools to improve visibility using Splunk.
- Implemented offsite backups and regular backup regimens to protect critical data.

Parcels Inc – Wilmington, Delaware

Security Analyst, Digital Forensics Examiner | *Sep 2022 – Apr 2026*

Family owned Litigation Support company with 250 employees providing Legal Services and Security Consulting.

- Led forensic collection and artifact analysis, generating hundreds of thousands of dollars of revenue.
- Designed, developed, and implemented forensic lab infrastructure, tools, SOPs, and workflows aligned with DFIR best practices and addressing gaps in ISO 27001 compliance.
- Prepared detailed forensic reports documenting investigative findings, technical analysis, remediation recommendations, and incident timelines for business, legal, and technical stakeholders.
- Supported expansion into cybersecurity consulting and incident response services, including process design and tool evaluation, increasing business opportunities and contracts.
- Developed remote collection stack drastically shortening collection time from days to hours and costs to business and clients by tens of thousands of dollars per year, increasing throughput, and avoiding the shipping of $5,000 hardware licensing dongles.
- Developed custom software and scripts in Python, Bash, and Powershell to solve unique collection and data analysis problems, saving significant time, increasing consistency, and reducing turnaround time on requests from days to hours.
- Delivered international training on macOS forensics to Albanian law enforcement in collaboration with the U.S. State Department.
- Presented CLE lectures to the Delaware Bar Association on digital forensics and cybersecurity topics.

Genesis Healthcare – Kennett Square, Pennsylvania
Publicly traded healthcare company, Largest Rehabilitation Therapy provider in the United States with over 150,000 employees.
Senior Business Analyst | *Dec 2018 – Sep 2022*
- Supported enterprise IT and security operations across large-scale healthcare environments involving regulated systems, and sensitive data.
- Served as senior analyst for IT systems, UAT tester for upgrades, and senior analyst for access, billing, and reporting issues.
- Validated disaster recovery processes, system controls, and audit readiness in regulated environments.
- Developed user stories and documentation to support EMR software use and configuration.

Integration Analyst | *Apr 2019 – Sep 2022*
- Implemented new integrations with client software.
- Supported and maintained over five hundred software integrations with customer software.

Implementation Analyst | *Feb 2014 – Sep 2022*
- Implemented and maintained Rehab Optima EMR software for business instances.
- Implemented and maintained billing Rehab Optima Billing software for business instances.
- Supported the roll out of a large business acquisition that saw the company double in size, becoming the largest rehabilitation provider in the United States.

Business Analyst | *Nov 2013 – Feb 2014*
- Supported software users by troubleshooting technical issues, answering calls, and creating/updating/resolving tickets.
- Validated and implemented access requests and therapist access to software instances.

Confiance Group – Remote
Jr. Integration Analyst | *Oct 2012 – Nov 2013*
Private small consulting company consisting of a dozen employees assisting clients with technical architecture and business process management.
- Supported global IT infrastructure monitoring and reporting initiatives for pharmaceutical clients.
- Modeled and improved business and technical processes to enhance system reliability and visibility.
- Maintained enterprise integrations and supported user experience improvements.

EDUCATION
Master of Science in Cybersecurity
Master of Science in Business Analytics and Information Management
University of Delaware | Newark, Delaware | Graduated 2023

Bachelor of Science in Information Science and Technology
Minor in Security and Risk Analysis
Pennsylvania State University | University Park, Pennsylvania | Graduated 2012

TECHNICAL PROJECTS
- Designed, deployed, and maintained a personal on-premises and remote home lab.
- Implemented and administered a pfSense firewall and router with OpenVPN and IPsec server to support secure remote access, network segmentation, and traffic inspection, and site-to-site communication.
- Deployed and managed a Pfsense appliance, Juniper managed switch, TrueNAS Core server hosting multiple jails running server and infrastructure services and a TrueNAS Scale server with multiple docker containers.
- Tested system hardening, firewall rules, and access controls to improve security posture and resilience.
- Performed network traffic analysis, monitoring, and segmentation testing to improve visibility, resilience, and defensive capabilities.
